Forecast for Wednesday 10 Mar 2021

Weather: This morning cloudy with some light rain and above 800m, light snow. The rain turning heavier and more persistent in the afternoon, with rain at all levels. Then turning more showery in the evening but winds continuing to strengthen to reach storm force.

Chance of cloud free mountain/hill tops above 800m: Little chance, perhaps a few brief clearances in the north in the morning.

Visibility: Mostly poor in heavy rain, drizzle and summit snow, also in cloud which will be extensive at 450-750m, occasionally 300m in south and west, perhaps broken for a time in the north in the morning.

Meteorologist's View

A poor day with conditions changing as demonstrated by the wind and temperature table

Forecast for Thursday 11 Mar 2021

Weather: A longer spell of rain in the early hours, clearing to broken cloud and occasional showers by daybreak. These showers turning increasingly to snow above 600m, with any left in the evening wintry to 400m though it will be mainly dry by then.

Maximum wind: Stormy overnight with southwesterly becoming westerly winds reaching 70 gusts 95mph the winds then slowly but steadily decreasing to 50 gusts 70mph by midday and 40 gusts 60mph in the evening.

Chance of cloud free mountain/hill tops above 800m: Little chance in the early hours, but 60% by day.

Visibility: Poor in rain overnight. Mainly good away from the cloud by day, with brief reductions to moderate or poor in showers. Broken cloud, mainly above 900m but some summit patches clinging on, and bases dropping to 600-700m at times near showers.

Temperature:
Valleys: Plus 7 Celsius in early hours falling to Plus 5 during the day and Plus 2 in the evening.
At 800m: Plus 2 Celsius in early hours falling to zero in the morning and Minus 2 by evening. Severe wind chill.
Freezing level: Above summits in early hours falling to 800m during the morning and 600m by evening.

Mountain Weather Forecast

Ground Conditions Supplement

Date: Tuesday 9 March 2021. Location: Blencathra summit at 12:20. Full report: We are continuing to provide the Fell Top Reports for people undertaking their daily local exercise during the lockdown. We would like to remind everyone that Government guidance stipulates that people should only exercise locally to where they live. Another relatively warm and cloudy day with the remaining snow cover continuing to slowly thaw. These patches of firm and icy snow are generally to be found on steep N through E aspects and in sheltered hollows above 850m. They can be a significant hazard where they are unavoidable for example at the top of Swirral Edge but overall the vast majority of other paths, including Striding Edge & Sharp Edge on Blencathra, can now be climbed without setting foot on snow. Summit temperatures were still only just above freezing with a wind chill of -5 degrees C so please go well equipped with plenty of warm and waterproof layers, hats and gloves, food and fluid and a reliable method of navigating. Please be conservative with your plans and know both your limits and also when to turn back. Temperature: plus 1.9 C, Maximum wind speed 18.6 mph, Wind chill: minus 5.1 C, Average wind speed: 13.5mph.
